

Creating the home you've been dreaming of!

DOING IT RIGHT

With help from D4 Construction

Vol. 4 #1

You need to know if your home's suffering from "sick building syndrome"

Is Your Home Killing You?

Making your home a safe place to live...

Over the next 12 months we'll discuss a variety of ways to make your home a better place to live in—especially if you have young children, seniors, and/or someone with health challenges living with you.

Some of these ideas you'll be able to implement for little to no cost - others may be more expensive – but the end result will be a healthier home—a healthier you.

A Hint of What's to Come

◆ ***Is Your Home Sick?***

Is your home suffering from "sick building syndrome"?

- ◆ Energy efficient home...
- ◆ R2000 home...
- ◆ Environmentally friendly home...
- ◆ Air tight home...

These are all synonyms for an airtight home that has a high potential of being a cesspool of germs and toxins.

Find out what you're airtight home could be doing to your health...

◆ ***Beware! The Dangers of Offgassing...***

- ⇒ What on earth is "offgassing"?
- ⇒ Is it dangerous?
- ⇒ Where does it come from?
- ⇒ Can you do anything about it?
- ⇒ How can you avoid it?

Are you suffering from the hazards of OFFGASSING?

◆ ***Does Your Home Have "Quality" Air?***

Did you know that the "stale air" you've been complaining about could actually be endangering your health?

What's really in the air you're breathing in your home? Is it safe? What should you do about it?

◆ ***Cleaner Air - The Inexpensive Way...***

Did you know that certain plants are great air purifiers? Find out which of these can help rid the air in your home of pollutants and toxins.

◆ ***You've Got Bugs!***

Spraying is an easy and effective way of getting rid of the pests but what does it do to your health? Here are some things to try before you call in the big guns. They may even work better and more permanently than their more toxic counterpart.

Be sure to add some of these inexpensive air purifiers to your home.

♦ ***Getting Better Air Quality for Under \$300...***

Did you know that your furnace provides the perfect environment for the growth and spread of germs and bacteria?

In this article we'll discuss a simple step you can take to stop germs and bacteria from growing and spreading throughout your home.

♦ ***Air - The Elixir of Life - How To Get More...***

Though considerably more expensive than the two methods listed above - this piece of equipment will not only refresh the air in your home it will do so efficiently and effectively without giving you that cold, drafty feeling.

♦ ***Don't Look Now - You've Got Mold...***

Nothing is more important than making your home a safe place to live - that's why learning about the dangers of mold and how to protect your family and your home from its ravages is so important.

♦ ***Is Your Basement a Breeding Ground for Mold?***

Damp basements are notorious mold breeding grounds - find out what you can do to fix this problem - hopefully once and for all.

Congratulations...

If you implement all the suggestions given over the next 10—11 months you can breathe and rest easy—you've done everything possible to make your home a safe and clean environment for your whole family.
